RECEIVED - WATER SUPPLY

# MISSISSIPPI STATE DEPARTMENT OF HEALOTHJUN 10 AM 10: 26 BUREAU OF PUBLIC WATER SUPPLY CCR CERTIFICATION FORM CALENDAR YEAR 2012 Public Water Supply Name Public Water Supply Name 0540017 - 0540069 List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. Since this is the first year of electronic delivery, we request you mail or fax a hard copy of the CCR and Certification Form to MSDH. Please check all boxes that apply.

	Customers were	e informed of availability of CCR by: (Attach of	copy of publication, water bill or other)
		Advertisement in local paper (attach copy of On water bills (attach copy of bill) Email message (MUST Email the message to Other_	advertisement) the address below)
	Date(s) custor	mers were informed: 5/24/13, /	/ , / /
	CCR was distr methods used	ibuted by U.S. Postal Service or other dire	ct delivery. Must specify other direct delivery
	Date Mailed/I	Distributed://	
	CCR was distrib	outed by Email (MUST Email MSDH a copy) As a URL (Provide URL As an attachment As text within the body of the email message	)
	CCR was publis	shed in local newspaper. (Attach copy of public	
	Name of New	spaper: The PANOLIAN	
,	Date Publishe	d: MAY/ 24/2013	
	CCR was posted	d in public places. (Attach list of locations)	Date Posted: MAY 124 / 2013
	CCR was posted	d on a publicly accessible internet site at the fo	llowing address ( <u>DIRECT URL REQUIRED</u> ):
CED	TIFICATION	<del></del>	
I her publithe Sthe	eby certify that to the control of t	the 2012 Consumer Confidence Report (CCI in the form and manner identified above are certify that the information included in this onitoring data provided to the public want, Bureau of Public Water Supply.	R) has been distributed to the customers of this ad that I used distribution methods allowed by CCR is true and correct and is consistent with ter system officials by the Mississippi State
Ke Nam	mnest DE e/Title (President,	Mayor, Owner, etc.)	5/31/13 Date
Burea	er or send via U.S. uu of Public Water Box 1700		May be faxed to: (601)576-7800

### **Annual Drinking Water Quality Report** Pope-Courtland Water Association PWS ID'S 0540017 and 0540069

May 20, 2013

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you shout the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is three weils that draw from the Middle Wilcox aquifer and the Lower Wilcox aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. Our wells received a moderate susceptibility to contamination.

I'm pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Gary Patterson at (662)-561-1099. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the second Tuesday of each month at 7:00 p.m. at 111 Van Voris, Batesville, MS.

The Pope-Courtland Water Association routinely moniture for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1<sup>st</sup> to December 31<sup>st</sup>, 2012 As water travels over the laid or underground, it can pick up substances or contaminants such as microbes, inorganic and organic elemicals, and radioactive substances. All drinking water, including butted drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected clsk to health. MCLGs allow for a margin of safety.

Parts per million (ppm) - Milligrams per liter (mg/L).

Parts per hillion (pph) - Micrograms per liter (ug/t.).

## Monitoring and reporting of compliance data violations \*\*\* Significant Deficiencies \*\*\* POPE SYSTEM ID #0540017

During a sanilary survey conducted on 8/9/2011, the Mississippi State Department of Health cited the following significant deficiency:

- #1 Lack of redundancy chlorination equipment "Completed"
- #2 Inadequate cleaning/maintenance of storage tanks "Completed"

## Monitoring and reporting of compliance data violations

During a sanitary survey conducted on 8/9/2011, the Mississippi State Department of Health cited the following

- #1 Lack of redundancy chlorination equipment "Completed"
- #2 inadequate cleaning/maintenance of storage tanks "Completed"
- #3 well near source of contamination "Completed"

Corrective actions: The system is currently under a Bilateral Compliance Agreement with the Mississippi State Department of Health to complete all of the deficiencies. All deficiencies have "Completed".

on accordance with the Radionuclides Rule, all community public water supplies were required to sample quarterly for radionuclides beginning January 2007. December 2007. Your public water supply completed sampling by the scheduled deadline; however, during an audit of the Ms. State Department of Health Radiological Health Laboratory; the Environmental Protection Agency (EPA) suspended analyses and reporting an additiogical compliance samples and results until further notice. Although this was not the result of inaction by the public water supply, MSHD was required to issue a violation. This is to notify you that as of this date, your water system has completed the monitoring requirements and is now in compliance with the Radionuclides Rule, If you have any questions, please contact Karen Walters. Director of Compliance & Enforcement, Bureau of Public Water Supply, at (601) 576-7518. 326 of Public Water Supply, at (601) 576-7518.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead itt drinking water is primarily from materials and components associated with service lines and home plumbing. Pupe Caurtland Water Association is responsible for providing high quality drinking water, but cannot centrol the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or oboding. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and stops you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601-576-7582 if you wish to have your water tested. contact 601-576-7582 if you wish to have your water tested.

All sources of drinking water are subject to potential commination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some containinants. The presence of contominants does not necessarily indicate that the water passes a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population, immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lesson the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

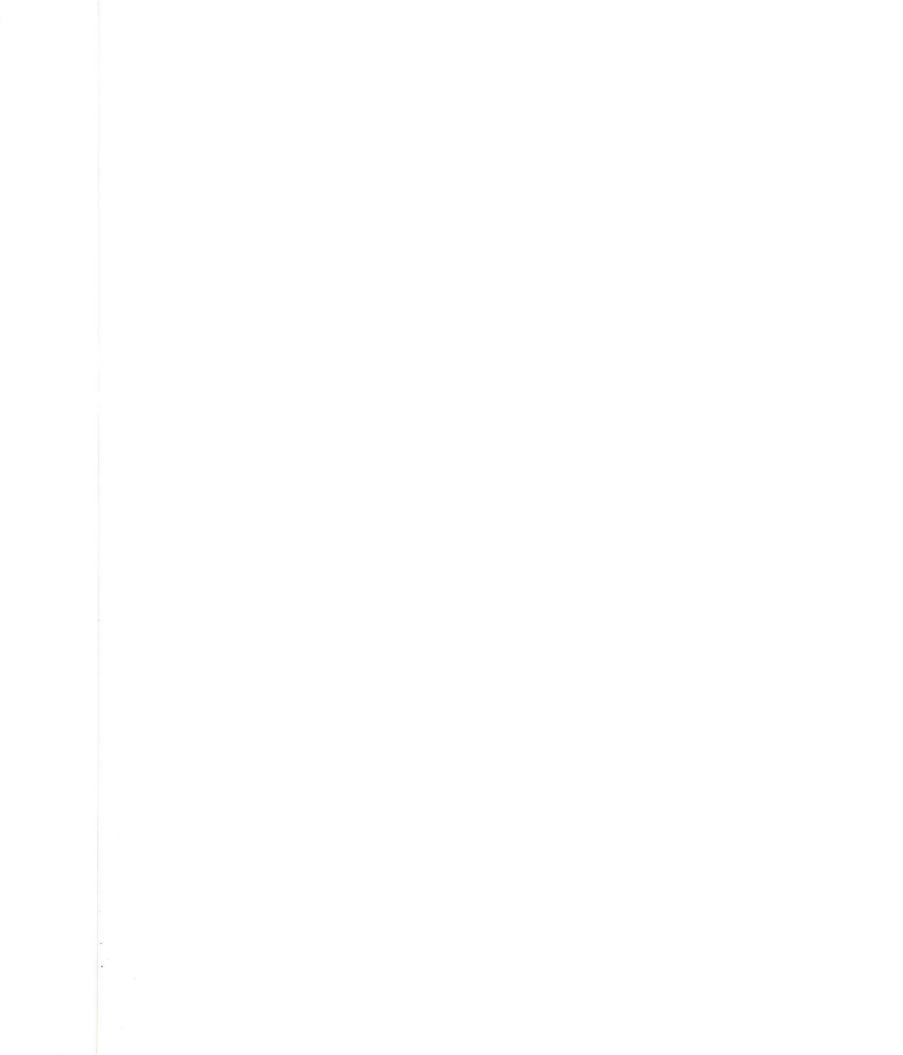

Your CCR will not be mailed to you however; you may obtain a copy from the water office please call (662) 561-1009 if you have questions.
